

Worried About the Ever-Rising price of Steel Decking?

TECTUM Inc. has been in business since 1949 offering a cementitious wood fiber acoustical Roof Deck as an alternative to Steel Deck. With the unpredictable price of BA deck or other acoustical steel decks, and the short supply of steel, Tectum Roof Deck is your answer. New ANSI S2.60.2002 guidelines that address acoustical performance in schools can be easily and effectively addressed using a Tectum Roof Deck. Tectum Roof Deck products are considered "green" and contribute to the LEED program.

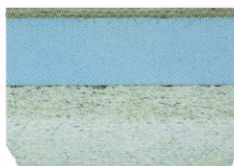

TECTUM I

Typically used in low slope applications and provides a thermal barrier for field applied foam plastics.

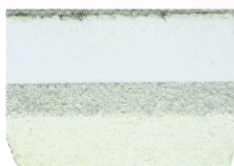

TECTUM III

Typically used in sloped applications where insulation and nailable surface is required.

TECTUM E

A composite of a Tectum substrate, EPS insulation and OSB board. The EPS core exceeds the requirements of ASTM C-578 Type I and bears the UL classification mark.
